Cisco Confidential

Cisco Systems, Inc., Raleigh, NC Oct 2019 – Present

Project Highlights include: Strategic software sales for Enterprise Agreements, ELA consumption, and subscription / recurring-revenue offers across Cisco's software portfolio.

- FY22 Americas Sales Champion, Services & Software
- Security, collaboration, networking, and data center software consumption plans
- Cisco Recurring Revenue Metrics (Feb 2022)
- SD-WAN, Meraki, security, contact center, and API/scripting use cases in software-led deals

Systems Engineer, Carolina Select

Cisco Systems, Inc., Raleigh, NC Jan 2015 – Oct 2019

Project Highlights include: Technical and Engineering coordination for Cisco Select Healthcare, Financial, and Manufacturing accounts based in South Carolina and North Carolina. Numerous competitive wins in Security, Collaboration, Data Center, Wireless, Enterprise, Management, and Software, blanketed in Advanced Services or partner-led engagements. Blended 100% consumption of ELA/software adoption consisting of UC, C1, and Security. CloudCenter, ACI, and UCS Director leveraged in competitive data-center-to-cloud conversations and catalog offerings modeled after Cisco-on-Cisco use cases. Driving UPOE and LED lighting with CREE.

- Customer Referenced Architecture delivered to every customer
- Onsite and customer facing; travel for EBCs and Global CRO experiences
- Full post-sales and customer excellence focused
- Cisco Live Expo for LED and UPOE experiences
- SE of multiple quarters in the Commercial region
- Maintain and support 7 Carolina Select customers
- High customer response and satisfaction feedback
- SD-WAN, Meraki, Security portfolio, Contact Center, huge wins
- Scripting and API use cases for Cisco offerings

Network Consulting Engineer

Cisco Systems, Inc., Raleigh, NC Mar 2013 – Jan 2015

Project Highlights include: Data Center Design and Implement WAAS and ACE appliances for customer production environments. This includes HLD and LLD as well as Network Implementation Plan documentation. Configure and Optimize Data Center networks. Work closely with Cisco TAC Engineers and BU to develop customer solutions, and troubleshoot various Cisco Data Center scenarios for enterprise deployments.

- Daily customer contact (Customer facing time +90% per quarter)
- Planning and Deliverables for Project Management
- Maintain and support 6 Advanced Services Enterprise Customers
- High customer response and satisfaction feedback
- UCS support and deployment
- On-site for Knowledge Transfers for customer trainings
