CISCO Support

Powered by Cisco IQ · Customer Value Deck v8.0 · October 2026

Abilities at a Glance

Lead with Standard or above · Seller conversation sheet

01 Complete landscape clarity

See the estate without gaps — inventory, lifecycle, coverage, criticality.

02 Proactive resilience

Catch exposure before the business feels it — RIS, PSIRT, LDoS, quantum.

03 Rapid resolution

Collapse hours to minutes — contextual TAC, AI troubleshooting, AI RMA.

CISCO SUPPORT TIER

Basic

Reactive foundational control

TAC 24x7 · S1/2 60 min · S3/4 NBD · software updates · hardware RMA · communities. IQ: inventory, tagging, coverage, LDoS dashboard, PSIRT/FN reports, case + RMA creation, self-serve troubleshooting. Cisco U. free library.

CISCO SUPPORT TIER

Standard · lead here

Proactive risk mitigation · includes Basic

Solution support / centralized triage · S1/2 30 min · S3/4 60 min. AI insights: criticality, LDoS/EOL, peer benchmarking, hardening, config, quantum, certificates, priority bugs, EoVS. RIS Playbook + automated OS upgrades. Contextual troubleshooting. Personalized Cisco U. paths. Standard QuickStart bridges Basic customers mid-term.

CISCO SUPPORT TIER

Signature

Operational excellence · includes Standard

Expert team that knows the estate. S1 15 min · restoration SLA. Systematic RCA, continuous optimization, asset management, periodic reviews, predictive disruption, config/hardening recommendations. Cert paths, 121+ labs, 20 named licenses. Full set requires USD $200k ACV.

STANDARD ABILITIES · CISCO IQ · * = AI-POWERED

COMPLETE LANDSCAPE CLARITY

- Controller and non-controller install base
- Asset inventory, tagging, coverage, last-signal activity
- EOL / LDoS dashboard + insights *
- Asset criticality scoring and risk rating *
- Peer benchmarking; Services EA growth report

PROACTIVE RESILIENCE

- Security advisories, Field Notices, config, hardening *
- Software conformance, IOS XE upgrades, priority bugs *
- Quantum readiness and PKI certificate expiration insights *
- Software end-of-vulnerability support (EoVS) *
- RIS Playbook: map attack surface → remediate (automated OS upgrade) → modernize (LDoS, quantum, EoVS)
- Standard+ is the digital layer RIS depends on — Basic was not built for this threat velocity

CONTEXTUAL LEARNING · CISCO U.

- Standard: 155+ courses, unlimited named users, auto-provisioned
- Signature: 95+ cert paths, practice exams, 121+ labs, 20 named licenses via SAMT, CE credits

RAPID RESOLUTION

- Contextual self-serve troubleshooting: live diagnostics + TAC knowledge + past cases *
- Streamlined case creation for serialized assets *
- AI-assisted RMA (Basic and Standard) *
- Automated RMA on connected DC hardware (Standard / Signature)
- Solution support: one case owner, Cisco + Solution Alliance triage (Standard+)

SIGNATURE EXTRAS · $200K ACV FOR THE FULL SET

- Restoration SLA with service credit if missed
- Named expert team familiar with the environment
- Systematic root-cause investigation beyond the device
- Continuous optimization and maintenance-window support
- Proactive asset management (location, contract, entitlement)
- Periodic service reviews, KPIs, post-incident improvements
- Predictive disruption analysis; config + hardening recommendations *
- Software technical onboarding / expert software deployment (Security & Collaboration; not Duo)
- Cisco U. cert paths, practice exams, 121+ remote labs, 20 named licenses, CE credits

CISCO IQ LINK · THE VALUE MULTIPLIER

One secure on-prem connector. Replaces CSPC / CX Agent. Unifies telemetry from Catalyst Center and non-controller devices. Bidirectional: insights in, commands and OS/security updates out.

- Unlocks deeper Standard+ assessments (hardening, config, quantum BOM, certificates, OS upgrade, RIS)
- Air-gapped IQ On-Prem VA available now; tethered mode coming soon
- Ask AI / local inference needs GPU; core lifecycle intelligence does not
- IQ APIs + MCP server: insights into existing tools and AI agents, at scale

DO NOT CONFUSE SUPPORT WITH PS

Cisco Support / Partner Support

Keep it running. Digital insights, TAC, RMA, RIS Playbook. Same customer-facing capabilities on Cisco Support and Cisco Partner Support.

Professional Services

Optional. Use PS-Transactional (or partner PS) for white-glove RIS remediation / modernization. PS-Sub / LCS is advisory + outcomes, not this TAC/IQ layer. IQ will later connect to Professional Services; LCS/BCS customers get IQ + IQ Link next.

BOUNDARIES FROM THE CUSTOMER VALUE DECK

Cisco Confidential — Cisco and partner use

Feature availability varies by platform. AppDynamics, Splunk, ThousandEyes, and CVM are not on Signature. Meraki is SLO only and not on Asset Management. SP Hardware and SIA subscriptions do not include software updates. Signature full deliverables require USD $200k ACV (GUID-aggregated). Partner Support Signature expected GA end of Q2 FY27. RIS is Standard+ digital layer; hands-on modernization is optional PS-T.
